
State of the Nation Report Provider Level Results

An audit of the care received by people with prostate cancer in
England and Wales from 01/01/2019 to 31/01/2023

Published January 2024

National Prostate Cancer Audit

NPCA State of the Nation Report Provider level results

This report was prepared by members of the NPCA Project Team

Noel Clarke, Urological Oncology Clinical Lead
Ajay Aggarwal, Oncology Clinical Lead (May 2023-Present)
Heather Payne, Oncology Clinical Lead (to May 2023)

Team members in NATCAN, based in the Clinical Effectiveness Unit, RCS England:

Adrian Cook, NPCA Senior Statistician
Thomas Cowling, NPCA Senior Methodologist
Joanna Dodkins, NPCA Clinical Fellow
Emily Mayne, NPCA Data Scientist
Jan van der Meulen, NPCA Methodological Lead
Julie Nossiter, Director of Operations, NATCAN
Marina Parry, NPCA Project Manager

The Royal College of Surgeons of England is an independent professional body committed to enabling surgeons to achieve and maintain the highest standards of surgical practice and patient care. As part of this it supports Audit and the evaluation of clinical effectiveness for surgery. Registered Charity No: 212808

In partnership with:

The British Association of Urological Surgeons (BAUS) was founded in 1945 and exists to promote the highest standards of practice in urology, for the benefit of patients, by fostering education, research and clinical excellence. BAUS is a registered charity and qualified medical practitioners practising in the field of urological surgery are eligible to apply for membership. Registered Charity no: 1127044

The British Uro-oncology Group (BUG) was formed in 2004 to meet the needs of clinical and medical oncologists specialising in the field of urology. As the only dedicated professional association for uro-oncologists, its overriding aim is to provide a networking and support forum for discussion and exchange of research and policy ideas.

Commissioned by:

The National Cancer Audit Collaborating Centre (NATCAN) is commissioned by the Healthcare Quality Improvement Partnership HQIP as part of the National Clinical Audit and Patient Outcomes Programme NCAPOP. NATCAN delivers national cancer audits in non-Hodgkin lymphoma, bowel, breast (primary and metastatic), oesophago-gastric, ovarian, kidney, lung, pancreatic and prostate cancers. HQIP is led by a consortium of the Academy of Medical Royal Colleges, the Royal College of Nursing, and National Voices. Its aim is to promote quality improvement in patient outcomes, and in particular, to increase the impact that clinical audit, outcome review programmes and registries have on healthcare quality in England and Wales. HQIP holds the contract to commission, manage and develop the National Clinical Audit and Patient Outcomes Programme NCAPOP, comprising around 40 projects covering care provided to people with a wide range of medical, surgical, and mental health conditions. The programme is funded by NHS England, the Welsh Government and, with some individual projects, other devolved administrations and crown dependencies. <https://www.hqip.org.uk/national-programmes>

Cancer Registration in England and Wales

This work uses data that has been provided by patients and collected by the NHS as part of their care and support.

For patients diagnosed in England, the data is collated, maintained and quality assured by the National Disease Registration Service (NDRS), which is part of NHS England. Access to the data was facilitated by the NHS England Data Access Request Service.

For patients diagnosed in Wales, the NPCA dataset is captured through a national system, Cancer Information System Cymru (CaNISC), after identification by hospital cancer services and uploaded via electronic MDT data collection systems to the Wales Cancer Network (WCN), Public Health Wales.

Appendix 1: Provider level (specialist MDT) data for the performance indicator 1	2
Performance indicator 1: Proportion of men diagnosed with metastatic disease.	
Appendix 2: Provider level (specialist MDT) data for the performance indicator 2	3
Performance indicator 2: Proportion of men with low-risk localised cancer undergoing radical prostate cancer treatment.	
Appendix 3: Provider level (specialist MDT) data for the performance indicator 3	4
Performance indicator 3: Proportion of men with high-risk/locally advanced disease undergoing radical prostate cancer treatment.	
Appendix 4: Provider level (surgical centre) data for the performance indicator 4	5
Performance indicator 4: Proportion of patients who had an emergency readmission within 90 days of radical prostate cancer surgery.	
Appendix 5: Provider level (surgical centre) data for the performance indicator 5	6
Performance indicator 5: Proportion of patients experiencing at least one genitourinary (GU) complication requiring a procedural/surgical intervention within 2 years of radical prostatectomy.	
Appendix 6: Provider level (radiotherapy centre) data for the performance indicator 6	7
Performance indicator 6: Proportion of patients receiving a procedure of the large bowel and a diagnosis indicating radiation toxicity (gastrointestinal (GI) complication) up to 2 years following radical prostate radiotherapy.	

Appendix 1: Provider level (specialist MDT) data for the performance indicator 1

Performance indicator 1: Proportion of men diagnosed with metastatic disease.
